Attention: C. H. Hucker, Jr., Executive Director
Oak Ridge National Laboratory

Subject: HANFORD SLUGS FOR RALA RUN NO. 30

Gentlemen:

Thirty-eight four inch Hanford slugs were delivered to you February 14 for use in the production of Rala Run No. 30.

Shipment was made from Hanford about 10:00 P.M. (PST), February 9. The slugs were obtained from as near as possible the center of process tube 2271 F and had 66 days effective exposure in the pile at a power factor of 1.478.

Zero power was 8:49 P.M. (PST), January 27. Next start-up was 11:35 A.M. (PST), January 28 after which pile operated at 125 megawatts until 8:00 P.M. (PST), January 29 when full power operation was resumed. Zero power before slug discharge was 2:20 A.M. (PST), February 8.

Sincerely yours,

CAUTION
